Water Storage Solution for BT Murrayfield Football Stadium, Edinburgh

A Fast Track GRP Water Tank Installation for a High Demand Stadium Facility

In 2025, Tricel Water was appointed by Scottish Water Business Stream (SWBS) to design, manufacture, and install two large GRP water storage tanks at Murrayfield Stadium.

With a major stadium event scheduled for 5 November, the project came with strict timescales, multiple stakeholders, and technical requirements that demanded precise engineering.

Thanks to close collaboration with Mott MacDonald, streamlined communication between all parties, and rapid mobilisation of our manufacturing and installation teams, both tanks were successfully installed ahead of deadline.

This project demonstrates Tricel's expertise in delivering complex, time-sensitive water infrastructure solutions for high-profile clients.

Project Information

Client: Murrayfield Stadium Edinburgh Park
Edinburgh EH12 5PJ

Industry: Sports & Leisure Facilities

Contractor: Tricel Water

Project: To manufacture 2 Large Potable Water Storage Tanks

TANK DIMENSIONS: 11m x 3m x 3m

Challenge: Tight Programme Deadline, Complex Stakeholder Coordination, Competitive Tender Environment, Contractual Risk

Timeline: Project Completion: Q3, 2025

GENERATIONS OF INNOVATION

CLIENT REQUIREMENTS

Murrayfield Stadium, one of Scotland's most iconic venues, required two large potable water storage tanks to support increased demand and ensure full compliance with performance and safety requirements. The client required:

- Two 11m x 3m x 3m GRP sectional tanks
- Quick turnaround from design approval to installation
- A supplier with full manufacturing control and the ability to support detailed technical submissions
- Guaranteed readiness before a major stadium event on 5 November 2025

The project was tendered through Scottish Water Business Stream, with design support from Mott MacDonald's Manchester and Aberdeen offices.

PROJECT CHALLENGES

- **Tight Programme:** Only weeks to design, manufacture, and install both tanks.
- **Stakeholder Coordination:** Multiple consultant offices required updated designs.
- **Competitive Tender:** Competing with Balmoral and Purewater.
- **Contractual Risk:** Delivery commitment only possible once the client confirmed the order.

SOLUTION & RESULTS:

TRICEL
GENERATIONS OF INNOVATION

Solution Highlights:

- Rapid design approval & DWG updates
- Fast-tracked manufacturing & installation
- Seamless coordination across teams

Results:

- Delivered ahead of deadline
- Full compliance with safety & performance standards
- Positive feedback from SWBS and consultants

Client Feedback

"Tricel's involvement from design stage ensured quality and timely delivery."
